VILKAS
CYBERSECURITY

Partner with a World-Class Pentest Team—Without Building One In-House

Expand your service offering, impress your clients, and generate new revenue by partnering with Vilkas Cybersecurity for expert penetration testing and red team assessments.

About Us

Founded by a veteran ethical hacker with nearly two decades of hands-on offensive security experience and a strong track record of training the next generation of testers. Vilkas has uncovered critical vulnerabilities in Fortune 500 companies, hedge funds, critical infrastructure, and high-growth startups.

We emphasize deep manual testing and consistently identify overlooked flaws that have persisted undetected—sometimes for years.

You can trust us to deliver excellence and protect your client relationships as if they were our own.

Why MSPs & MSSPs Partner With Us

- White-label or Co-Branded Delivery
- Non-Compete Guarantee
- Elite Manual Testing by Experts, 15+ Years of Experience
- Compliance-Ready for HIPAA, PCI-DSS, SOC 2, and More
- Flexible Partner Terms — Referral, Commission, or Wholesale Options

What We Offer

Network & Infrastructure Penetration Testing
Simulated attacks on internal and external environments to uncover impactful vulnerabilities and misconfigurations

Web Application Security Testing
Manual testing of custom-built and third-party web applications following industry best practices

Red Team Assessments
Realistic multi-vector attacks—social engineering, perimeter assessments, assumed breach scenarios, and stolen laptop simulations—to emulate advanced persistent threats

Social Engineering & Phishing Simulations
Human-layer testing to assess user susceptibility and raise awareness through realistic campaigns

Active Directory & Cloud Security Reviews
In-depth assessments from multiple perspectives to uncover both common and nuanced misconfigurations, with actionable hardening guidance
